

## Monkey toe Diaper Service Do's and Don't

### Do's:

- Change your baby often
- Use a diaper cover to protect your furniture and other stuff these can be purchased from [www.monkeytoediapers.com](http://www.monkeytoediapers.com) we will issue you a discount link once a contract is signed and you will receive 10 percent off all purchases made at the on line store. We will deliver your orders with your clean diapers.
- We recommend you get yourself a 54 quart tall kitchen garbage can with a lid to put the pail liners in to toss the dirties into. However the bags we provide will hang from a door knob.
- Shake solid poopy diapers into the toilet. This is only necessary when the poop has become solid at the newborn stage when they are on a liquid diet poop is not solid. If you bottle feed the poop is more solid and should roll off into the toilet.
- Only use the diaper pail liner provided by Monkey Toe Diapers to put the dirty diapers in on pick up days.
- Please try to stay away from diaper rash creams that have zinc oxide in them. If you need to use it please use the flushable diaper liners. We provide you with 1 free package at your first delivery.
- Please make an appointment with Susan at her home, to learn how to use it all.
- Notify us of vacations when you do not want service 2 weeks in advance so we can suspend your service that week.
- Feel proud of doing something natural and good for your little one.

### Don't:

- Use the diapers as cleaning rags
- Wash the diapers
- be afraid to ask us questions
- forget to leave the diapers out for pick up
- put out anything but the diapers you are renting from us in the diaper bags provided on pick up day.
